ACCOUNTING FOR  
SUCCESS

# Thrive — the only custom-built cloud accounting system for charities

Thrive, is a *simple & secure cloud-based accounting solution* developed to meet the specific requirements of the voluntary & charity sector.

Uniquely, each accounting solution is *tailored to meet the exact needs of each organisation* after detailed analysis and consultation.

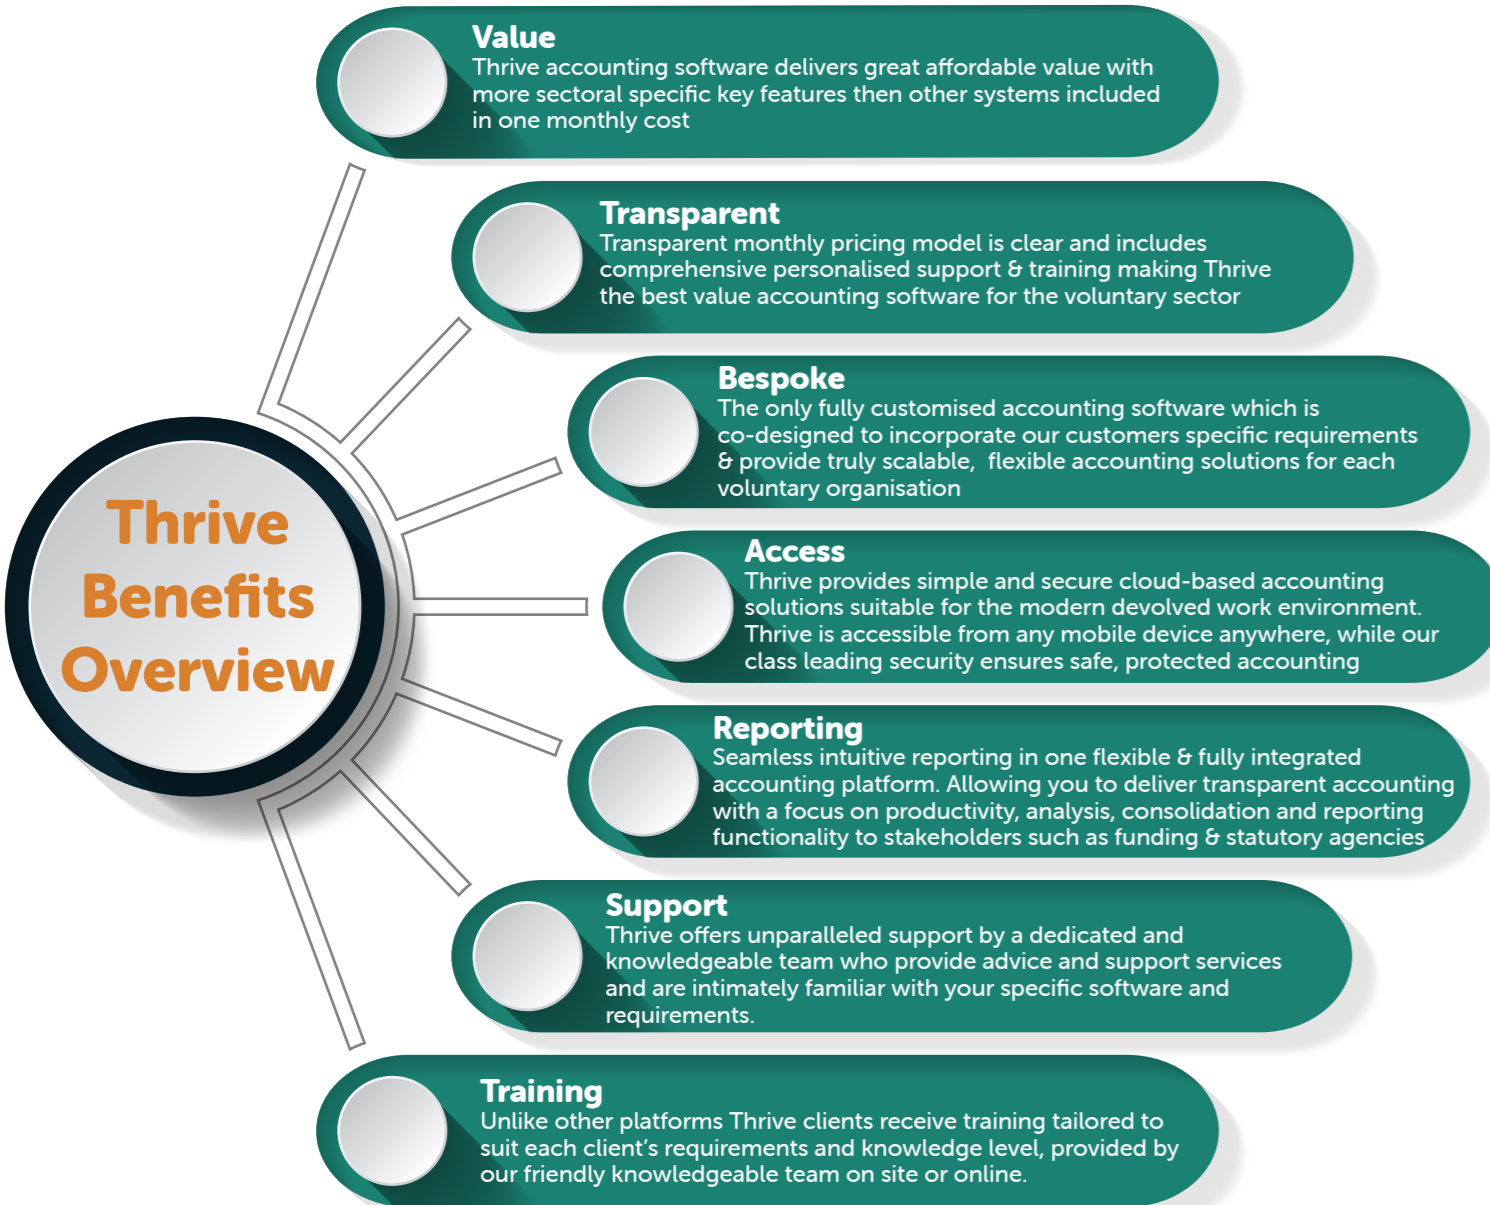

This ensures an *affordable and fully integrated accounting system* which streamlines & simplifies organisational accounting and provides solid insights and reporting tools, allowing organisations to focus on the people behind the numbers.

Our *dedicated training and support team of accounting technicians and software developers* provide sectoral specific assistance helping each customer to realise the full value from Thrive's extensive features.

The unique co-design process ensures high levels of relevant functionality and the clear concise structuring allows your team to work seamlessly and securely on mobile devices from any location while your *data is encrypted and secured* using the most advanced cybersecurity intelligence.

Thrive *offers more functions and features than any other SaaS product* delivering an amazing value package tailored to your needs while our clear transparent pricing structure means there are no hidden costs.

Thrive *allows you to concentrate on delivering services* while we provide class leading transparent accounting and reporting with support.

## Thrive Accounting System Features

- 01 Streamlined Invoicing**  
Thrive easily integrates with Microsoft 365 allowing charities to create once off or recurring invoices streamlining the billing process removing the need for time consuming paper-based billing.
- 02 Secure Remote Access**  
Our cloud-based platform provides the security and flexibility required for modern teams in multiple locations. Assign access to each team member, track changes and usage by each team member securely from any location at any time.
- 03 Informed Decision Making**  
Thrive allows you to present clear and transparent financial reporting and projections to stakeholders such as boards and funding agencies with concise relevant presentations and a core focus on productivity, analysis, consolidation and reporting functionality.
- 04 Intelligent Project Costing**  
Monitor projections and track ongoing cost centres for specific jobs or projects with an integrated appraisal module providing accurate real time reporting from all assigned users.
- 05 Full Integration Capabilities**  
Our experienced team of software developers seamlessly integrate Thrive Accounting Software with any third-party software identified in the consultation and co design phase.
- 06 Close-off Accounts Quickly**  
Our complete monthly account overview of multi-currency and multi-location consolidated accounts makes closing-off monthly accounts effortless with accurate reporting and tracking.
- 07 Superior Stock Management**  
Thrive utilises intelligent inventory management to accurately track stock such as T-Shirts and promotional materials providing full accountability. Our integrated purchase ordering processes provides automatic reordering levels so stock will never be fully
- 08 Real-Time Bank Account Integration**  
Thrive accounting software seamlessly integrates with your bank account for improved efficiencies when reconciling accounts.
- 09 CRM Compatibility**  
Capturing, storing, and tracking your organisations customer or subscriber data is crucial to enable ongoing engagement, fundraising and brand awareness. Thrive features a customised CRM system built directly into the accounting software allowing
- 10 Streamlined Payroll**  
Save time and remove the need to export and import files between systems with Thrive's fully integrated payroll capabilities which seamlessly work with Thesaurus and other payroll systems.

### What our customers say...

"Any Issues, any problems and all we have to do is pick up the phone and we're straight through to the Thrive team who know our accounting system inside out and are there to help us straight away, we're not waiting or logging a call."

MDI Systems

"The things that are unique for our business were listened to and catered for. Where we've come back with tweaks they have been implemented. It's a very adaptable system."
